CAREER OBJECTIVE

B.Tech CSE student with expertise in backend development and hybrid recommendation systems. Proficient in Python, SQL, and Machine Learning. Passionate about leveraging data-driven architectures like KAHN to solve real-world scalability challenges.

EDUCATION

Maharaja Agrasen Institute of Technology (GGSIPU) <i>B.Tech in Computer Science & Engineering</i>	2023 – Present <i>CGPA: 8.0</i>
Mukherji Memorial Sr. Sec. School <i>Class 12 (PCM)</i>	<i>Score: 80%</i>

TECHNICAL SKILLS

Languages: Python, C++
ML/Data Tools: XGBoost, Scikit-learn, Pandas, NumPy, SQL, Power BI, Tableau
Backend/Search: Flask, REST APIs, Semantic Search (Sentence-Transformers)
Frontend: HTML, CSS, React.js
Tools: Git, GitHub, Postman, Web Scraping (BeautifulSoup)
Core Concepts: OOP, Data Structures & Algorithms, DBMS, Operating Systems

PROJECTS

AI Based Career Recommendation System

Python, XGBoost, Cosine similarity, Flask

- Architected a hybrid recommendation system for career matching, utilizing the **O*NET Content Model** as a professional benchmark to mitigate dataset bias.
- Engineered a dual-stream pipeline separating **Quantitative Eligibility** (XGBoost classification) from **Qualitative Affinity** (Semantic Search/Vector Embeddings).
- Enhanced matching resolution by mapping user skill-sets against standardized occupational requirements.
- Designed a scalable backend to handle high-dimensional career data beyond static training labels.

Product Price Tracker & Analysis Web App

Python, Flask, Pandas, Web Scraping

- Developed a Flask application to scrape and monitor real-time product data from e-commerce sites.
- Implemented data cleaning and comparative analysis using Pandas to identify price volatility.
- Visualized price trends and average comparisons through a responsive web interface.

Data Analysis Dashboard

Power BI, SQL

- Engineered an interactive dashboard to visualize key business performance metrics.
- Performed complex SQL joins and data transformation to prepare structured reporting datasets.

EXPERIENCE

Paytm

Backend Developer Intern

Jul 2025 – Aug 2025

- Built and optimized REST APIs, improving request handling performance and latency.
- Debugged backend workflows and resolved production-level API issues using Postman.
- Validated database queries to ensure efficient data retrieval and system reliability.

NTPC

Backend & Database Intern

Jul 2024 – Aug 2024

- Developed SQL queries for efficient data retrieval and automated backend processing tasks.
- Maintained data consistency across large-scale operational reports.
